Trimble eCognition Software For Object-based Image Analysis Workshop

Want to get started with eCognition software for geospatial data analysis? Come to the eCognition workshop where we will introduce you to Geographic object based image analysis (GEOBIA). eCognition will be used to demonstrate image segmentation and classification. We will touch on the concepts of expert knowledge based classification, and machine learning classification. Demo software will be available for a hands on learning experience.

When:
November 15th, 9:30 am – 11 am

Where:
Geography and Environmental Studies computing lab (Room 106, Bandelier East Hall)
